

HİDROMAT 3212

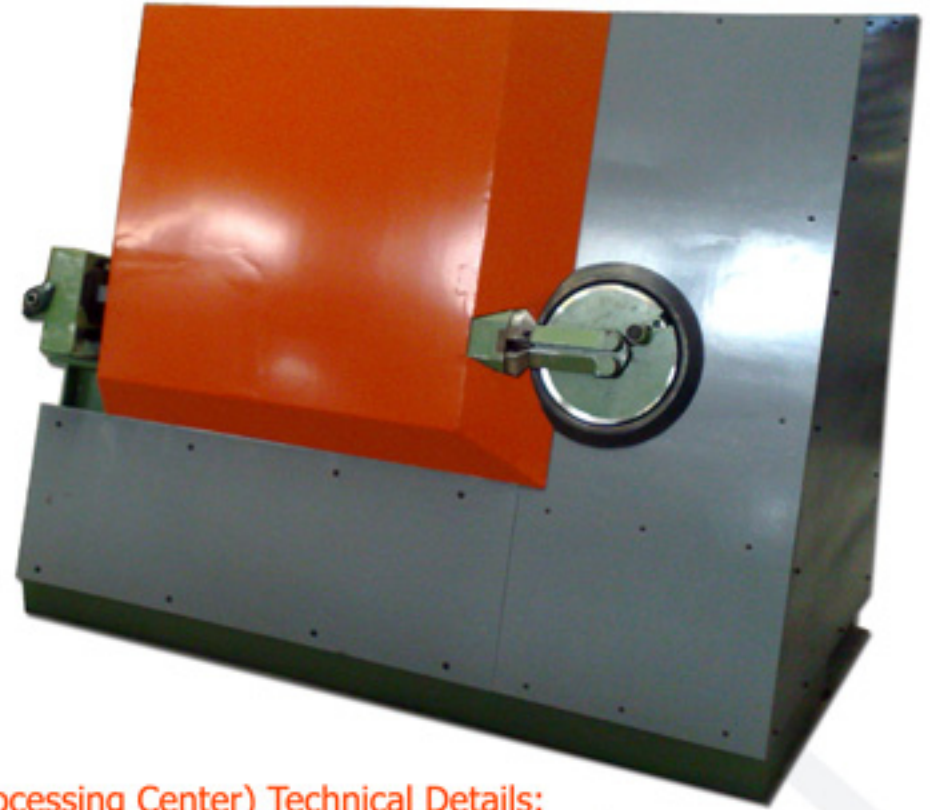

ROBOMAT 2212

* HİDROMAT 3212 ...Rebar Processing Center...

... Processing both Rebar and Hot Rolled Coils in the same machine ...
... High performance of production rate at small areas by modular system ...

» Hidromat (Rebar Processing Center) Technical Details:

Working Range	:Up to Ø14 mm with coil. :Up to Ø16mm with Rebars.
Capacity of Bending System	:Ø16 mm. :Hydraulic.
Hydraulic Motor Power	:11 Kw Ac motor.
Cutting Speed	:75-80m/min.
Program	:Includes the length optimization program, production control and machine controls can be controlled by a touch screen PLC, the velocities can be increased and decreased online. Operator can see the pressure and the encoder values on the screen.

Our company has the rights of changing the designs on the machines without informing.
